I want to play a 2 player game with me and my friend. But it always seem to put me in pending mode when I host the game and my friend on a screen which he cannot move on. All I want is a 2 player battle. Can someone tell me how to do a 2 player game? How do I get off host mode anyway?

Sounds like you've got it set up as a dedicated server. When you're creating the game, uncheck the 'Dedicated Server' box on the top of the Advanced page.
