1st off: The pistol in Renegade is not automatic.

2nd of all: That is a common glitch in which the scroller on the mouse can make the pistol pop out with the scope of the sniper rifle. If spawn weapons are on, then every single weapon can have a scope, essentially.

Javaxcx1st off: The pistol in Renegade is not automatic.

I do believe when you hold down the trigger, it continues to fire automatically. You don't have to click for every shot. Wouldn't that make it an automatic pistol?

XKMonkeyJavaxcx1st off: The pistol in Renegade is not automatic.

I do believe when you hold down the trigger, it continues to fire automatically. You don't have to click for every shot. Wouldn't that make it an automatic pistol?

Wouldn't that also mean you have an automatic sniper rifle, shotgun, and automatic warheads in a tank?

I do not think so.

Wouldn't that also mean you have an automatic sniper rifle, shotgun, and automatic warheads in a tank?

I do not think so.

It's automatic if it keeps firing while the trigger is depressed. So if you look at it that way, yes those are automatics. They just fire alot slower.

JavaxcxWouldn't that also mean you have an automatic sniper rifle, shotgun, and automatic warheards in a tank?

I do not think so.

The tanks aren't automatic, since they have to reload after every shot. As for the other ones, I'd say the best thing to check would be the first person animations to see if the trigger is pulled with each shot, or if just holding the mouse button makes your character continuously pull the trigger. I'd do it myself, but I can't seem to run Renegade anymore.

Yeah, as a player, it's effectively fully automatic. You keep the trigger down and it keeps firing. It's actually better that automatic since it'll reload without letting go too

It may animate it otherwise, but that's just just for show.
