Erm... right...

Well, ERA has recently grabbed itself a new server, and ive been chucked in charge of BR. Dandy. So far I've got it talking to the console, but it won't respond to commands, even on IRC. Has anyone else had a similar problem, and more importantly, does anyone know what I can do to fix it. It's quite irritating. I can never have all 3 bits working at once. IRC, BR itself or sometimes just the server. I wish they'd all just work...

Thanks in advance for help, Cas

Also in IRC it only responds to people who have been given +v, +h or +o

Why can't I use the !msg command? It doesn't seem to work. The other commands work fine. Also I have a friend in the IRC channel, and I gave him both +o and +v and he still can't execute commands, not even !gaminfo. Why? How can this be resolved?

Check the remote admin port and the remote admin pass.

The RemoteAdminPort MUST be the same as in server.ini

The RemoteAdminPass MUST be exactly eight letters long!

How To Configure BRenBot
