Hello all first of all, im new at this forum,i used to be registerd here as csjpnod a 1.5 year ago. But
seems it lost my old nick. Why i actualy registerd now again is because i cant run renegade with
my Nocdcrack, I use Safe2diskcleaner 1.12. can anyone tell me why its not working anymore?
Thanks to all people who designed and build rengaurd i hope every server will run this!!

We don't have that file. Send me your game2.exe file to mac@renguard.com and I will add it.
Thanks.

Mac, would you take some time and ensure that all the files on C&C Commando are on the safe
list?
