I'm not sure it's even ready to be used with RA yet. Wait for the installer version from Black Hand Studios when we're ready to release.

No, I don't get a window. I get absolutely nothing.

I hope this is what you meant by directory listing. I wasn't entirely sure.

---

Since RenAlert was in a seperate directory I didn't expect RenGuard to do anything to RenAlert.

You still have renguard running.

Close it and then try.

Well, that was semi-embarassing. Closed it and it worked. I totally forgot it was still running down there in the task bar.

Thanks, Try_lee.
