Link added to http://www.renguard.com for a "Safe Installer" that is just a zipfile with instructions to manually install RenGuard. This will help those few who have problems with Setup.exe crashing, and also those who for whatever reasons cannot get a successful auto-update. When new versions of RenGuard are released/updated, we will also update the SafeInstall archive. You MUST read the Readme.First!!!.txt and follow the directions (dont worry they are short and simple)!

Installed just fine with me. I just think most of the RG servers will be dead for awhile before people start to figure this out. Hopefully you guys can make this happen.

Either servers will use it and gradually people will get it, or servers will dislike the low content of players and deal with their mods doing the dirty work.

I just hope all that good work doesn't go to waste. Cheers!

its ok dude

just click on renegade like normal (if u have installed RG properly)

its will launch all by its self
