When is start brenbot or the standalone renguard i get this message:

```
./brenbot: relocation error: ./brenbot: undefined symbol: Perl_Gsigfpe_saved_ptr
```

The previous version of brenbot is working fine

we are running on gentoo 1.4

I've been having the same problem with Fendorf core 1 and a compile of Perl 5.8.3 from perl.org.
HELP!
