I had to re-install renegade and renguard to get it to the MOTD screen. When i go to a RenGuard required game, a message pops up saying, " b00mb00m0, you need renguard to play on this server. Download it from <http://www.renguard.com>" then is kicks me. i downloaded it from the right website, and it works fine, but appaerently isnt recognized when entering a server. Any help on this subject would be greatly appreciated. Thank you.

When you started RenGuard, did it welcome you by your name?

Try opening, closing, and restarting Renguard until there isn't a significant "hang time" before Renguard finishes loading; as in, until the hang time is the shortest it can last after repeated RG reloads.
