Any chance of putting up a page on the Renguard web site:

Bugs that have been fixed in each version.
So that we can see at a glance whether a given bug has been resolved?

This would be for BRenBot, SSC and the game client.

Blazermantis.n00bstories.com :rolleyes:

What I am asking for is "Release Notes", is there any way to generate release notes from Mantis, i.e.:
A summary of all bugs that have been in each product version?

PS Adding the version number of each executable to the download page would be useful too.

Yes i like this idea too Gib, dunno if its alot of work though.
Im on this mantis too alot 'jus-lookin' etc.

But for the people who just use BRenBot and RenGuard and have less experience with it, it maybe usefull to have such a page.
