Tub, Mark and myself would like you to stop spamming these forums advertising for us, do not speak on the behalf of hostvirus or its staff please, this is not the place for it, no one "holla" at him he is not staff, he does not have any power to help you with anything on our servers so DO NOT SEND ANY MONEY TO THIS PERSON, , and SS was being a smartass. So please dont advertise like this if u want to help us out just put a sig image from the forums in your sig.

Everyone, listen to me, i think most of you respect me a tad, or at least know im not going to screw you guys over with a "virus" or w/e, this site really is relieble, we have never gone down so far, and already hosting a number of servers for the communy and hosting as well. I guarentee

you will not be screwed over, if you have any questions or concerns please contact myself or mark78109 with them.

Tub serioulsy please stop!! When you said you would advertise my site I didnt think you would do it this way we have already made a post in these forums which didnt go to well and should not of

been done again.

Sorry to everyone for causing any trouble to you and please if you have any questions do not respond to him as for i have not given him any authority to be accepting emails or money from any of you. so please do not respond to him.

I am though offering him a discount which may be the reason he wanted you to email him but as said before do not send him any info or money as he has no association with hostvirus except to advertise.

16 player renegade server

renguard, br.net, and renstat all installed
completly free webspace and forum set up for as long as a server is rented
free tech support from people who actally play games and know how to help

all 25.00 a month seems like a good deal to me, if you all cant look past the name, its just plain sad, if you dont trust me, i feel sorry for you cusae i would not screw you over. Think what you want, im sure the people who already rent servers from us would tell you differnetly. Please Crimson just lock this thread up, all it is is needless bashing, please lock it up.

Never said I hated you.
Your opinion is indeed biased since you work there.
Heck, I don't even have to "ruin anything you're part of", you're doing it yourself.

And yes, Xptek your professional opinion does count.

Ok then, I think it's a great hosting service. So far, the admins I have spoken with are friendly, and respectfull. Their prices are great and their uptime is fantastic.
