I have a way of getting aircraft in to MP.It's sloppy but works.Basically,nod constantly has apaches dropped to them.The curse is they do NOT get a harvester or anyother vehicle other then an apache.Bonus is they get apaches free so they have no real need for money.As for GDI,I do not know if there even IS a script file for the factory so they do not get orcas.What I wish to know is if Dev accepts this so i maybe able to release this mod.Also it takes a bit of practice to get an apache sadly.If anyone knows the script file for the GDI factory and this way of having aircraft is acceptable please let me know and gdi shall have orcas!

No go on! I'd be happy to hear ideas! So long as it does not start something huge here (although that's hard to avoid).

They way renegade is setup this script runs in bot practice AND MP,so the answer would be both
I am acutally testing it in MP Practice

Yeah, it's a cool thing and works in MP. But as soon as I post about it in the General Forum it gets deleted. Does any1 know why? I mean come on - I've never ever seen a game company that actively tries to PREVENT people from modding their last game.

Snirpo, I downloaded that file, put it in my Renegade/Data folder and started up MP practice. I switched to Nod, and the C-130 came by and dropped nothing...It did this about 4 times and still nothing.
