Sorry my english is not so good but i try it:

I have installed renguard. First I can't play renegade with the old button. then i found the button game2. So I played with this button. But now if i get into any server, the server would kick me after a few seconds with this information:

You was kick out of the server because one of the following 2 soil:
-the server was shut down or the connection was broken.

Server wurde heruntergefahren oder die Verbindung unterbrochen)

And that happend by the servers which are connect with renguard. Why? What have I done or not done? Please help me. thanks

Sounds like you have bad files. Do you have any messages in the text area suggesting why you can't stay connected to the RenGuard network?

We just got a list of better explanations for errors from jonwil. I will be posting them on Renguard.com soon.

What is the EXACT text of the error message you're getting?

I have found my problem. I opened Renegade with the button game2.exe and yesterday i tried it with the button game.exe. It work.

But...

Today I opened it and the programm has written this:

Trying to connect to server #1....Connected
Connected to server
Renguard is attempting to autoupdate itself.

But it takes too long time. Now i wait 30 minutes that it work or it has download the update. Whats the problem?

matze4444I have found my problem. I opened Renegade with the button game2.exe and yesterday i tried it with the button game.exe. It work.

But...

Today I opened it and the programm has written this:

Trying to connect to server #1....Connected
Connected to server
Renguard is attempting to autoupdate itself.

But it takes too long time. Now i wait 30 minutes that it work or it has download the update. Whats the problem?

Download the installer on <http://www.renguard.com> instead, it should work.
