hi, i use the nocdcrack, but my renguard is not working properly.

after installing and running renguard, it shows me that i cant join pure servers because of my skins (doesn`t matter)

but when i wanna join a server in ase, renguard loads up (ver 1.0; no auto-update)
and i hit the renegade button.
the game is loading to the main menu (singlep,multip,options,.....)

thats all, no connecting to server
