Ok, I know I am going to sound like a complete uninformed idiot, but bear with me, ok? Three questions:1) Has the aircraft add-on pack been made available for public download yet?2) Has Westwood released the gmax tool yet?3) Is this tool going to be the only way to make levels, or is there an editor included that I just haven't found?

1 - It is still being beta tested. Expect it to be released in the next few weeks.2 - They have released it, however we are still missing the SDK which allows us to put the models into the game.3 - As far as we know, the SDK will be the BEST way to make editors, although there might be other ways.

It's ok if I can't get it into the game yet, I still need some time to practice making levels. Where can I get the tool?
